

Submission Details for Programming Assignments

Program Submission

- You will submit reports to Gradescope showing successful execution of your programs:
 - reports will be in pdf form
 - for each HW/Lab problem, include the **6 sections** shown below. Each of these sections will be ***titled and start on a new page***. The sections are as follows:
 - ***successful compilation*** of your program (provide screenshot)
 - your program running on ***the provided example from the assignment*** (provide screenshot)
 - your program should produce the same/similar output as provided in the example
 - your program running on ***the provided test input*** (provide screenshot)
 - the test input will be given a day before the due date
 - your program demonstrating success on an ***important edge case*** (provide a description of the edge case, input, expected output, and a screenshot of your program's execution)
 - your program demonstrating success on an ***important edge case*** (provide a description of the edge case, input, expected output, and a screenshot of your program's execution)
 - your program demonstrating success on an ***important edge case*** (provide a description of the edge case, input, expected output, and a screenshot of your program's execution)
 - for each LeetCode problem, include only ***a single section***:
 - ***acceptance of your solution*** to an approved problem (provide screenshot)
 - **reports do NOT need to be long or elaborate!**
 - don't spend too much time on this! simple and clear is perfect :)
- All code submissions will be through Canvas
 - your code should be able to run on open lab
 - your code and relevant files should be submitted in a single zipped file
 - the top folder for each program should have a *readme.txt* file that includes the following:
 - the exact terminal commands needed to compile and run your program on open lab
 - any special instructions
 - PLEASE KEEP SHORT AND SIMPLE!!!
